B.Tech in Computer Science, NIT Raipur

Why Amjix

Focus on whats practically done in CA practice:

We don't just do data analytics like our competitors . Our AI model directly generates Audit report (Form 3CD income tax audit , Form GSTR 9/9C GST Audit , CARO company audit)

Introducing AI in Auditing and Accounting for the first time in India :

Our Auditors GPT helps the auditors to trace anomalies and ask any questions on accounts in natural language

Affordability :

We offer our products in the line of "AI at every CA office" . All CA firms even in Tier 3 cities will find our solutions value for money

Specific AI for CA's:

We don't offer generic AI tools such as PDF editing tools , Chat GPT etc.. Instead we have our own AI models that offer Auditmaker (All tax , GST , company audit) , Financemaker (CMA , appraisals , project report in every banks format) , Tax-GPT (upload your income tax / GST notice and get reply)

“ AI MEETS AI “

- **One AI means:**
AUDITING INTELLIGENCE
- **Second AI means:**
ARTIFICIAL INTELLIGENCE

“ Our AI model is built in such a way as to understand any business transaction , understand all tax laws , apply all tax laws and accounting standards in any accounting scenario “

Our Products in development

This tool can make All your papers for finance
such as CMA , projections , project report

FINANCEMAKER.AI

your chat-GPT for all tax
related questions , this can
even draft a reply for you ,
just upload your notice

TAX – GPT

An Auditing tool does tax /
GST / Company audit by
itself

AUDITMAKER.AI

Our PMS can manage CA
Firms : documents , tasks ,
Clients , employees all in
One roof .

PMS

Traction and Validation

New Entrant

Despite being a new company, we have drawn a lot of interest from potential clients with our cutting-edge technology and affordable prices.

Market Research

In order to comprehend the requirements and preferences of our target market, we have carried out in-depth market research.

Positive Responses

Our product has received positive responses from early adopters and industry experts, confirming its usefulness and commercial relevance.

Commitment to ICAI

» Custom Development

Apart from our standard products (Auditmaker , Financemaker , Tax- GPT) we are committed at developing custom AI models/softwarewares that are intended to serve CA firms across India.

» Product Demonstrations

To highlight the features and advantages of our products to potential clients, the sales team would do product demonstrations to each CA firm

» AI Models

Our AI models are built good enough to handle any accounting scenario in Tier 2/3 Cities . We commit to regularly train our models to fulfill large datasets like SAP

Auditmaker

Auditmaker.AI

COPILOT AUDITING

**THE FOLLOWING SLIDES WILL BREIF THROUGH FLAGSHIP
PRODUCT OF AMJIX - AUDITMAKER**

The problem

▶▶ Time-Consuming Processes

Manual procedures including data analysis, compliance checks, and report preparation are part of traditional auditing methods, which take up a lot of time and resources.

▶▶ Inefficiencies

Traditional auditing procedures are prone to inefficiencies, errors, and delays because these duties are manual.

▶▶ Arrival of AI-Based Software

Amjix upends this system by bringing in AI-based auditing software, which expedites and automates audit processes.

The solution

1

All-inclusive Solution

Auditmaker is offered by Amjix. an auditing program with an AI foundation that provides a comprehensive audit process solution.

2

Automation

Right from ledger scrutiny to generating analytics reports to generating Audit reports (Form 3CD , GSTR 9 , CARO) to generating financial statements (as per schedule 3 , icai technical guide for non corporates) to correcting books .We have covered it all and its just 1 click away !

3

Efficiency:

Auditmaker.AI expedites the audit process by automating these operations, doing tasks that would typically take hours or days in a matter of minutes with Improved accuracy.

4

Empowerment:

The automation gives CA businesses more time and resources to devote to making strategic decisions and offering their clients value-added services. Also , Auditmaker. Ai has in-built practice management system within itself , that helps CA firms to keep a track of assignments and allocate them to their team .

FEATURES OF AUDITMAKER

1

ONE CLICK IMPORT

just open your accounting software and auditmaker will import data from your software in just a click Supported softwares : Tally ERP , Tally Prime , Busy , Zoho Books.

2

Data scrutiny at speed of light

Auditmaker processes data within seconds to generate 100+ error reports / analytics report that help auditor to form an opinion .

3

GSTR 9/9C GST audit reports

Auditmaker will draft the audit report by itself in government JSON schema and it can be filed in GST portal . Auditmaker is a registered ASP (application suvidha provider for GST) hence it can get all GST filings in a single click .

4

44 clauses of Tax audit report (form 3CD) in less than 44 seconds

Auditmaker will draft the audit report by itself in government JSON schema and it can be filed in income tax portal.

5

Smart Reconciliations

Reconcile your books with GST and other data (GST returns , TDS returns , bank statement , party statement) . Using the AI models Auditmaker can detect probable matches.

6

Company Audit is easy now

With the help of Auditmaker , you can generate schedule 3 financial statements at one click . Also generate audit report including CARO at one go

INTRODUCING AUDITORS GPT

Auditor GPT Inbuilt in Auditmaker enables the Auditor to talk to accounting data . Here are the few sample questions you can ask:

INTRODUCING AUDITORS GPT

- Give me a list of receipt/payment vouchers where voucher type is journal
- Give me list of top 10 expenses monthwise
- Check for any entry which seems to be irregular
- Check if sales have been made to related party at lower price then market
- Give purchases in excess of 50 lacs from a single party
- Give transactions on Sunday

INTRODUCING REVERSE SYNC BOT

Guess what , after finding mistakes in accounting data , Auditmaker can even correct the same for accounting purposes

INTRODUCING REVERSE SYNC BOT

- **Change group of a ledger**
- **Change voucher type**
- **Change Name and master details of ledger**
- **Auto pass entries from GST returns that are not present in accounts**
- **Change party/amount of any voucher**
- **Break 1 voucher into multiple sub vouchers**
