

Reason to build the Office AI Bot Product

Over the past 15+ years, I have successfully completed over 1,200+ automation projects for 48+ clients across various industries globally.

Remarkably, approximately 60% of these solutions have been effectively replicated across most projects, which is noted to be the hidden cost.

This initiated me to create the automation tool. Excel tasks have been identified as significant bottlenecks, slowing down productivity. By identifying and automating these tasks, we can save valuable time and dollars enhance overall productivity efficiency.

Case Study - Finance & Accounting To be editedg

1

Consolidation

Combine Multiple
Files to single file

2

Work Allocation

Random Allocation
Priority Allocation
Percentage Allocation

3

File Splitter

Segregate the file to

- Workbooks
- Sheets

4

Data Transformer

Convert Raw Data to
a structured Data

5

Reconcile

- Single Recon
- Multiple Recon

6

File Comparison

Compare 2 sheets
to identify the
changes in value

7

Mass Mail

Sending Individual
mail based on
user Status

8

Digital Marketing

Sending Flyers
Poster In the mail

9

Workflow

Connecting
available Bots

Our Office AI Bots

Features

- Robotic Process Automation (RPA)
- Business Process Management (BPM)
- Machine Learning Algorithms
- Automated Process Mining and Documentation
- Conversation Automation
- Workflow Automation
- Reporting and Analytics
- Security Features

Benefits

- Increased Efficiency
- Cost Savings
- Accuracy and Consistency
- Scalability
- Enhanced Data Collection and Analysis
- Unlocking Insights
- Resource Optimization
- Error Reduction

Insights

- Rapid deployment
- Accessibility
- Diverse automation capabilities
- Providing actionable insights - dashboards
- People-Centric Approach
- Impact on Workforce
- Strategic Priority
- Operating Model
